FOR INDIAN FAMILIES ABROAD · AGES 3–10

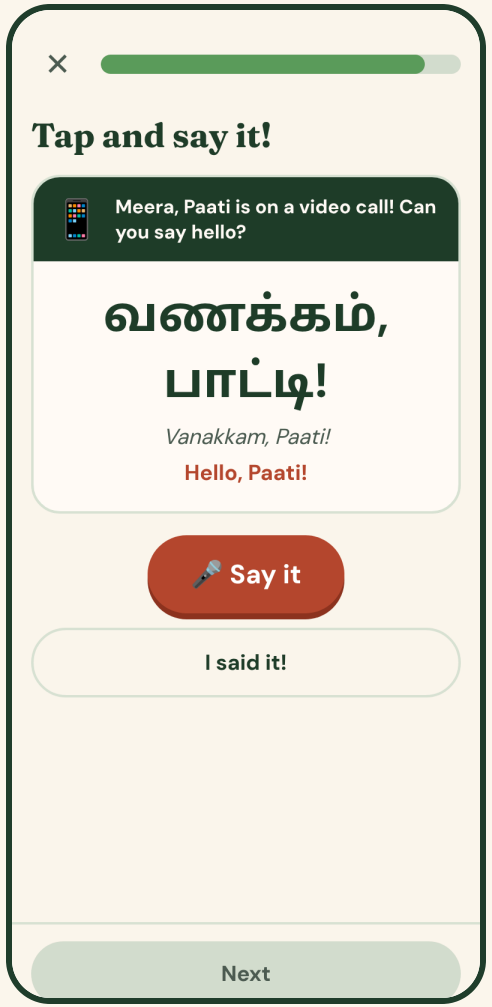

Rootling

Little roots, big words.

Personalised lessons, stories and games that help children speak their family's language, so the next call with Paati or Nani is a real conversation.

www.rootling.space

THE PROBLEM

Children understand the family language, but answer in English.

One-word calls

Video calls with grandparents shrink to “hi” and “bye” because the child can’t say more.

Busy, not fluent

Parents abroad are short on time, and many aren’t confident enough in the language to teach it.

Apps don’t fit

Language apps target adults and readers, skip regional languages like Tamil or Telugu, and punish mistakes.

“Nothing exists for a 4-year-old learning Tamil to talk to Paati.”

WHO IT'S FOR

Three people, one goal: a real conversation

Parents

Customer and account owner. Want a safe, ad-free way to pass on the language and see progress.

Children 3–10

The learner. Need short, playful lessons that work before they can read.

Grandparents

The audience. Want to actually talk with their grandchildren, in their own language.

Every family has its own word for grandma and grandpa, and the child chooses theirs

பாட்டி Paati · தாத்தா Thaatha · అమ్మమ్మ Ammamma · తాతయ్య Thaathayya · दादी Dadi · નાની Nani · ಅಜ್ಜಿ Baa · അപ്പൂപ്പൻ Appooppan

Markets: US, UK, Canada, Australia, Singapore and the Gulf, where children grow up speaking English at school.

THE SOLUTION

5–10 minutes of play that ends in “say it to your grandparent”

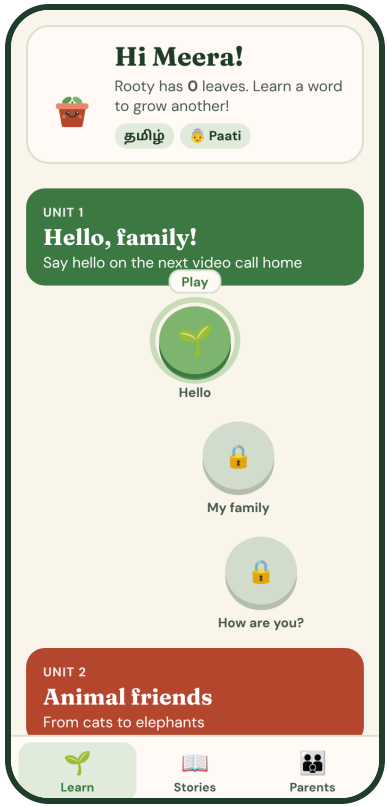

🌱 **Personalised:** the child’s name and their own word for grandma (Paati, Ammamma, Dadi) in every lesson and story

🎈 **Play first:** no hearts or lives; a wrong answer fades away and every lesson ends in a win

👶 **Age-aware:** under-6s use pictures and sounds; older children also read and build sentences

🎤 **Tap and say it:** a video-call scene where the child says a real line out loud

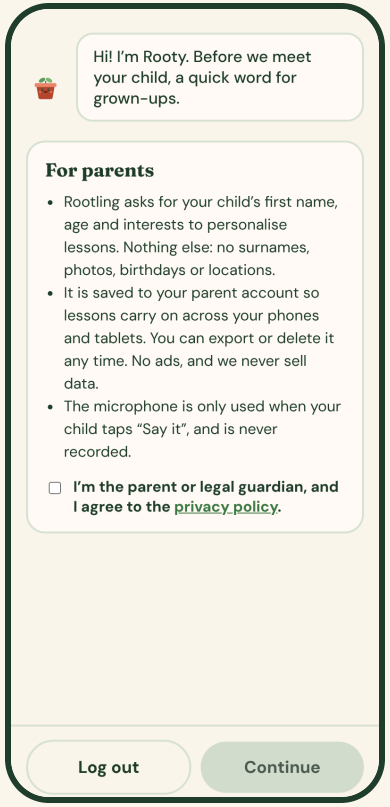

🪴 **Rooty** the sprout grows a leaf for every word learned

The lesson path

HOW IT WORKS

Set up by a grown-up, played by the child

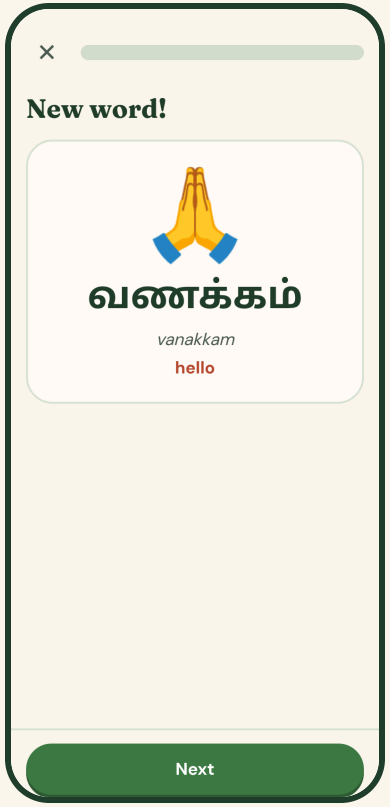

1 · Parent agrees first

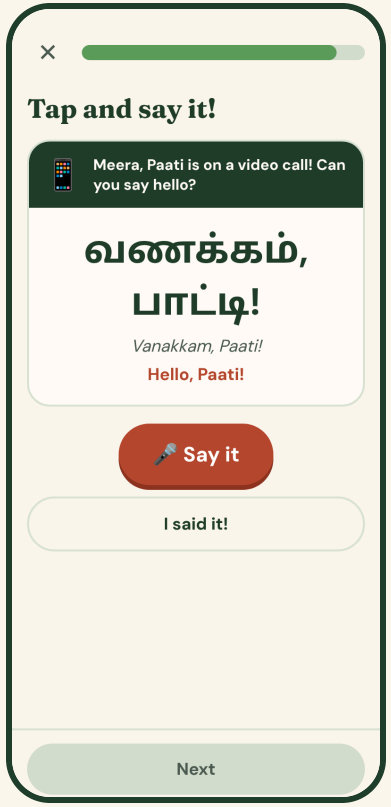

2 · Family language

3 · Who they talk to

4 · Meet a word

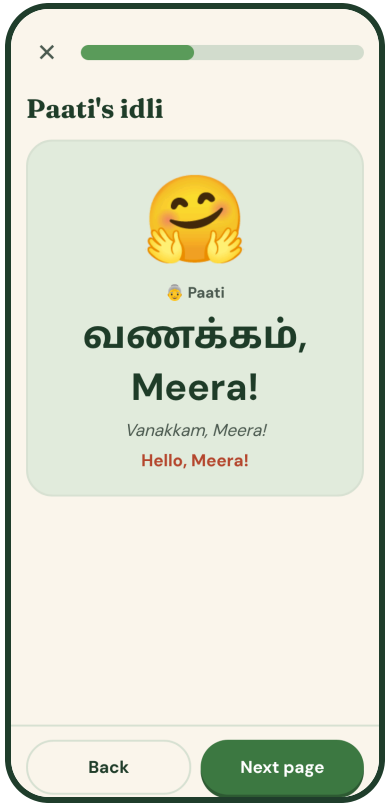

5 · Say it to Paati

INSIDE THE APP

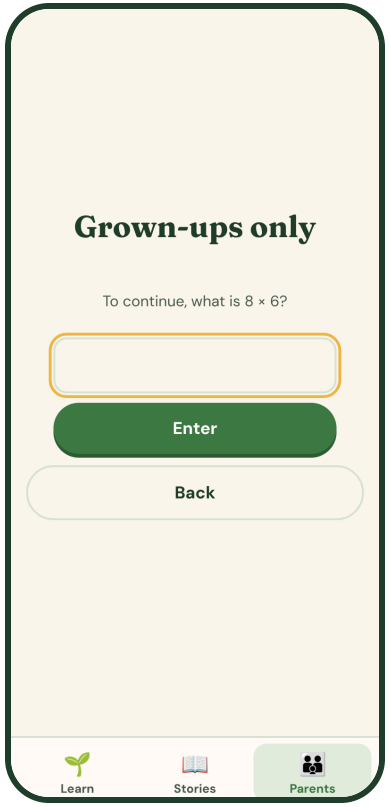

Lessons, stories and a parents area

CONTENT

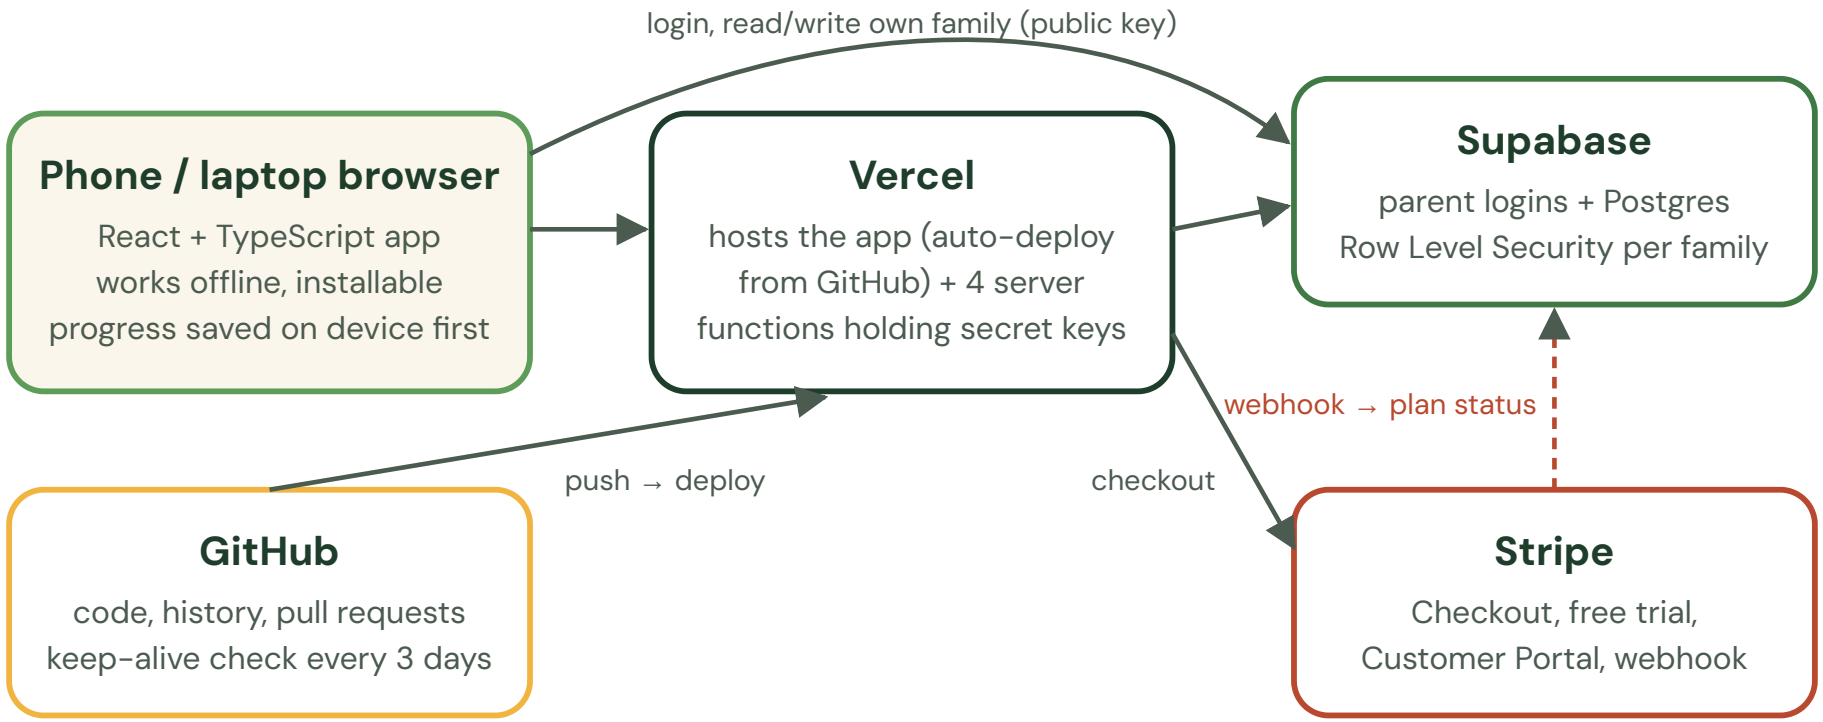

Five Indian languages, built for review

5	28	107	5
languages	lessons	words	bedtime stories

LANGUAGE	STATUS	UNITS	LESSONS	WORDS	STORIES
தமிழ் Tamil	Launch	5	8	27	1
తెలుగు Telugu	Preview	5	8	28	1
ਪੰਜਾਬੀ Punjabi · ગુજરાતી Gujarati · മലയാളം Malayalam	Preview	3 each	4 each	17–18	1 each

HOW IT IS BUILT

A web app anyone can install

Offline-first sync merges progress across devices · secret keys never reach the browser · ~6,400 lines of TypeScript, SQL and CSS

CHILD SAFETY BY DESIGN

Built for children from day one

🔒 Parents own accounts

Consent is recorded before any child details. Children never type an email or password.

🌱 Minimal data

Only a first name, age, language, family member, interests and progress. No photos, birthdays, locations or voice.

🙅 No ads or trackers

Fonts bundled, strict Content-Security-Policy. Browser test: **0 third-party requests** while a child plays.

🗂 Parents in control

Download all family data, remove a child, or delete the account, which also cancels billing immediately.

🛡 Isolated families

Row Level Security in the database: a parent can only ever see their own children.

💳 Payments for grown-ups

Checkout lives behind the grown-ups check, never on a child's screen.

QUALITY

Tested, and a real bug fixed after launch

CHECK	RESULT
Automated tests	40 / 40
Database security rules	All pass
Supabase security advisor	0 findings
Phone-size browser walkthroughs	Pass
Live test on a real laptop	Pass

🐞 Found on a real iPhone

The app froze after login. Database logs showed the phone re-loading the same data dozens of times a second.

2,988
loads in 3 s, before

4
loads in 3 s, after

Cause: a function re-created on every screen update re-triggered the data load. Reproduced, fixed and shipped the same day.

BUSINESS MODEL

Free to start, $19 a month to grow

Seedling

Free

- ✓ First unit of every language
- ✓ A bedtime story per language
- ✓ Parents area with progress

Sprout

$19/month

- ★ **First month free**
- ✓ Every lesson in every language
- ✓ Up to 4 children, synced devices

The waitlist records which language each family wants, so new languages launch in order of real demand.

WHAT'S NEXT

From working product to launch

Native speakers

Review all 179 lines in the review sheet, then record audio. Tamil first, then Telugu.

Legal & live payments

Lawyer review for COPPA and the UK Children's Code; Stripe live mode; paid hosting tiers.

Grow

Personalised videos, Gujarati and Punjabi to launch, then App Store and Google Play.
